SUMMARY

While working at a hotel front desk I saw what was missing in the day-to-day work and built three digital tools for the same business: a QR menu, a lobby information display and an agency invoice tracker. Spotting the problem, the product decisions and the verification are mine; I produce the code with AI tools (Claude Code, ChatGPT Codex), reading and steering it.

EXPERIENCE

Front Desk Agent

A hotel in Erdek (seasonal) · May 2023 – September 2026

- Used the AKINSOFT Wolvox Hotel, Accounting and Cafe programs in daily front-office work.
- Was the first person called for computer problems at the business.
- Tracked invoices issued to travel agencies and their payments with a tool I built; reported to management from it.
- Had an Android TV stick chosen for the lobby TV, set up the information panel with a kiosk app and kept it running for about two years.
- Moved the restaurant's printed menu to a QR menu updated from an admin panel.

PROJECTS

All three were built for the same business and used there. Working demos are on the site.

QR Menu

A digital menu opened by QR code, with an admin panel to manage it, built for the restaurant of a hotel in Erdek.

Lobby Information Display

A web-based information panel I built for the TV facing the reception desk of a hotel in Erdek; it stayed on around the clock through the season.

baranbostan1.github.io/en/projects/lobby-display

Agency Invoice and Payment Tracker

An internal tool that records invoices issued to travel agencies and the payments they make, and shows the balance per agency. Built for front-office tracking, not for accounting.

EDUCATION

Management Information Systems, bachelor's degree

Bandırma Onyedi Eylül University · 2025

LANGUAGES

Turkish (native)

English (intermediate)

SKILLS

AI-assisted development

Claude Code, ChatGPT Codex

Used in projects

Firebase, Cloudflare, GitHub Pages

Basic reading level

HTML, CSS, SQL

Office and systems

Excel (intermediate), Windows setup, troubleshooting by research

Hotel software

AKINSOFT Wolvox Hotel, Accounting, Cafe
